## 1. Specification/规格

|                       |          |  |
|-----------------------|----------|--|
| Seam specification:   | 线迹规格:    | 401,502 Ssa-2 401, 502Ssa-2                  |
| Feed:                 | 送料方式:    | Plain feed with upper feed 上下送料              |
| Stitch range:         | 针距范围:    | 6-13mm 6-13 毫米                               |
| Overseam Width:       | 包缝宽度:    | 12mm (special order 15mm) 12 毫米 (特殊定单 15 毫米) |
| Seam width overall:   | 线迹总宽度    | 17mm (special order 20mm) 17 毫米 (特殊定单 20 毫米) |
| Sewing capacity:      | 缝厚能力:    | Max. 22mm 最大 22 毫米                           |
| Needle clearance:     | 针间距      | 5mm 5 毫米                                     |
| Needle type and size: | 针的类型和规格: | UY9853G 430                                  |
| Thread:               | 线:       | Polyproprene 6000 Denier 聚丙烯 6000 支          |
| Maximum speed:        | 最高速度:    | 1,400 rpm 1400 转/分                           |
| Working Speed:        | 工作速度:    | 1,200 rpm 1200 转/分                           |

### ○ DESCRIPTION

Double needle, plain feed, flat bed, four thread safety overseaming stitch machine.

(Standard: for Container bags with filler cord, upper and lower)

### ○ 说明

双针，上下送料，平底座，四线包边链锁缝纫。

(标准: 适用于带有高位和低位防漏条的包装袋)

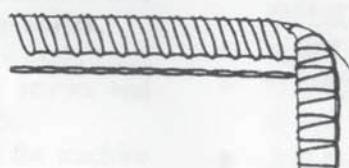

### ○ APPLICATION

For safety overseaming from light weight of PP/PE woven cloth bags to heavy weight of container bags.

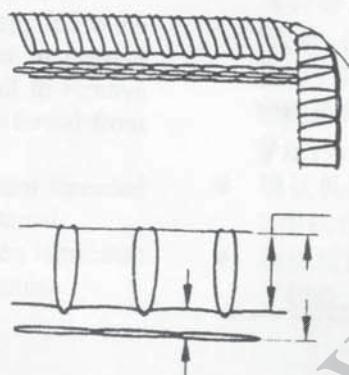

### ○ 应用

适用于从重量轻的 PP/PE 编织布袋到重量重的包装袋的安全包缝。

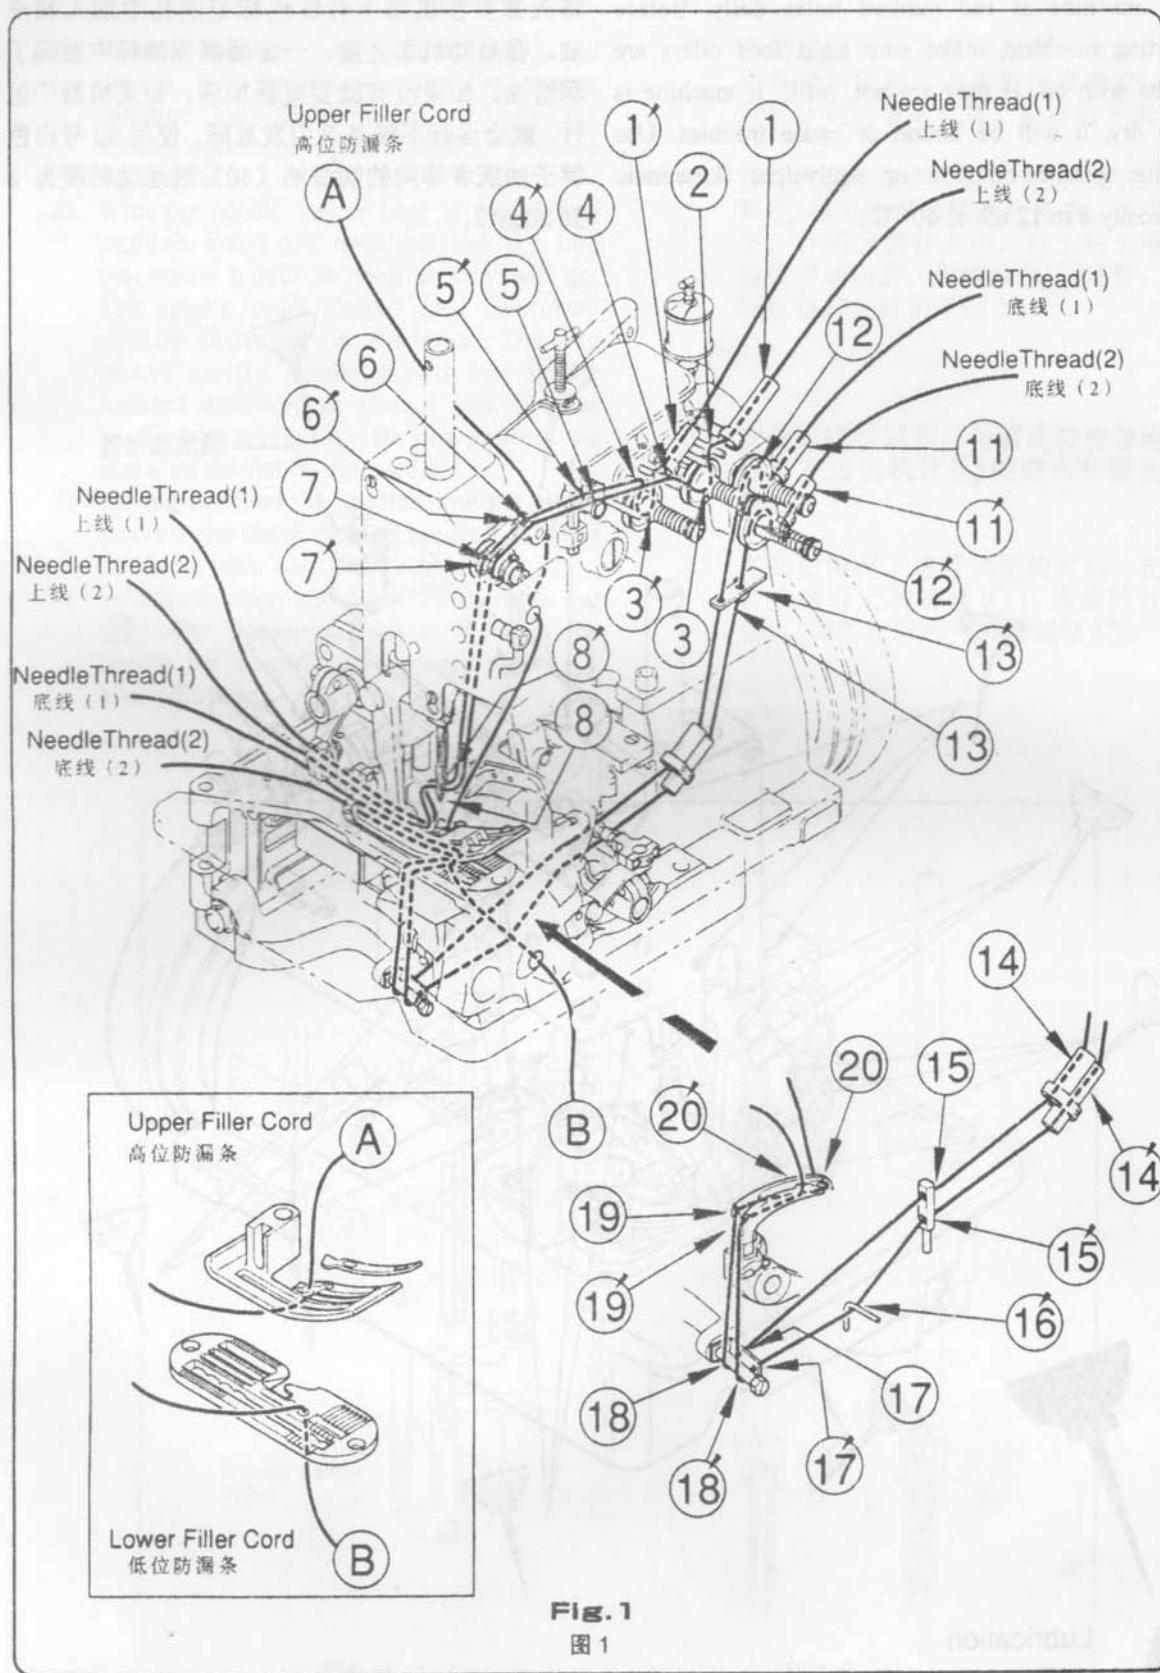

■ Stitch without Filler Cord

■ Stitch with Filler Cord

## 2. Threading/穿线

### 3. Lubrication/润滑

Oil machine at red marked holes daily. Before starting machine, make sure sight feed oilers are filled with oil. If they are not, refill. If machine is run dry, it will be bound or cause troubles. Use white spindle oil #60 or equivalent (kinematic viscosity 8 to 12 cSt at 40 °C).

每天都要在机器上有红色标记的孔中加入润滑油。在启动机器之前，一定要确保油杯中装满了润滑油。如果没有就要重新加满。如果机器干运行，就会运行不畅甚至引发故障。使用 60 号白色锭子油或者等同的润滑油（40°C 时运动粘度为 8 到 20cSt）。

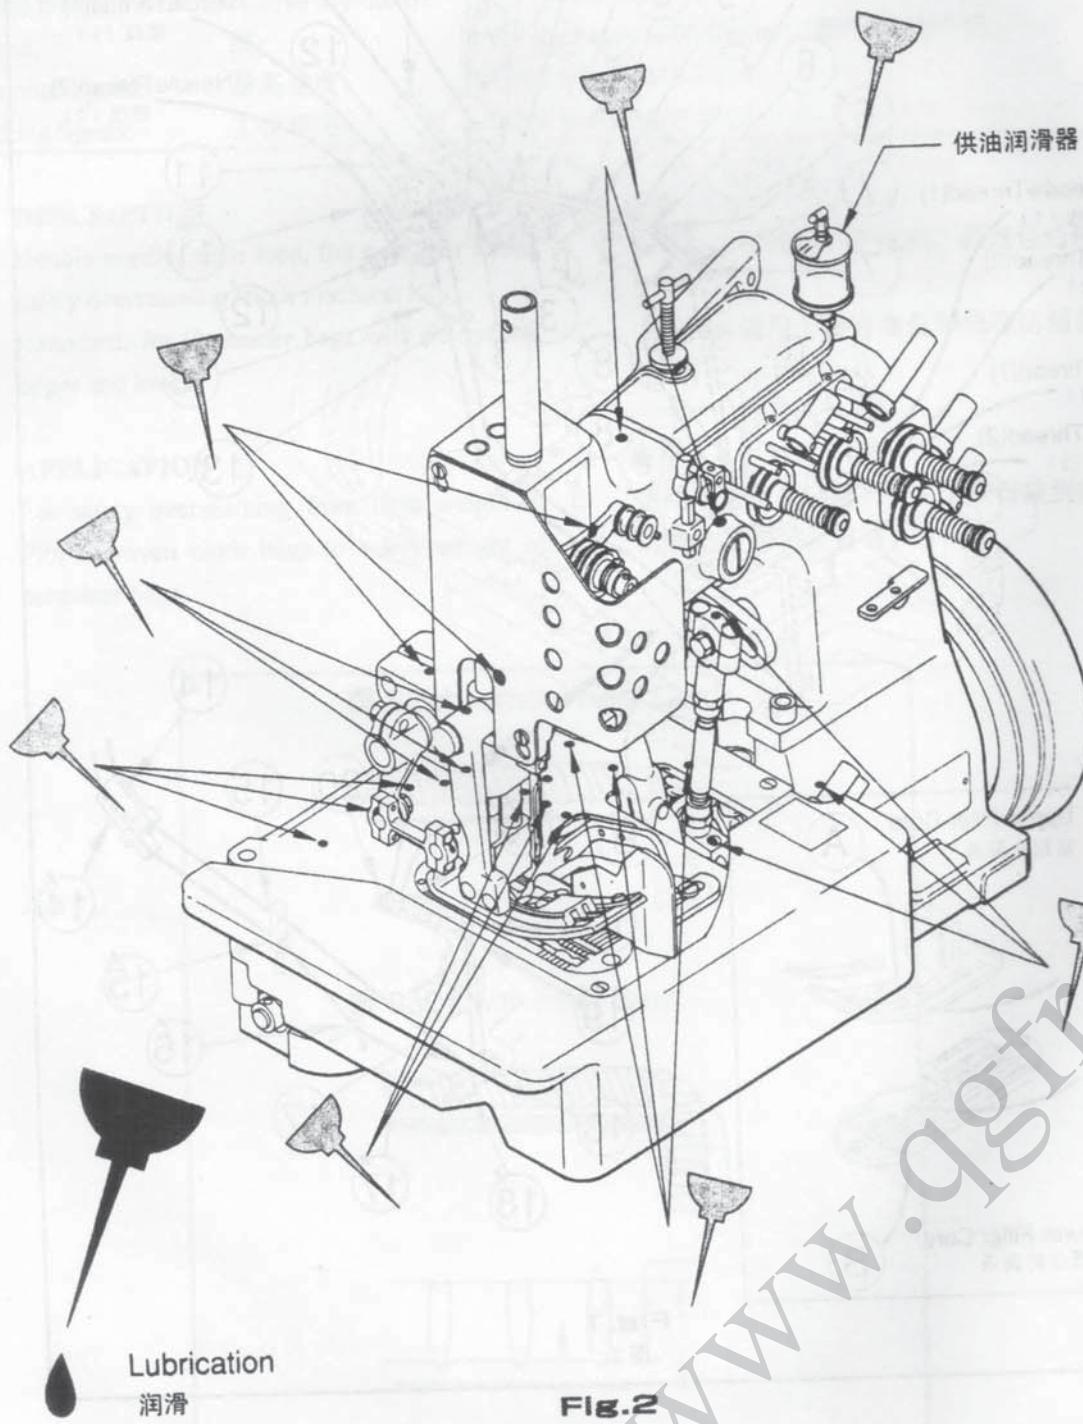

Fig.2  
图 2

## 4. Adjusting/调整

### 4-1. Setting the Needle (Figures 3 and 4)

- 1) Remove the top cover, upper feed dog, and presser foot before adjusting the sewing machine. Turn the pulley forward until the needles reach the highest position. Remove the needles.
- 2) With the needle holder kept in the highest position, insert new needles® and ① into the needle holder as deep as they will go. The needle point should face downward with the shank put into the holder. The long groove on the needle should face in the forward direction, or toward you. Fix the needle with screw ④. Be sure to apply the screw on the flat on the needle.
- 3) Having installed the needles, turn the pulley forward and check that left needle ① enters the throat plate hole at the center.
- 4) To adjust when necessary, turn needle bar ② after loosening screw ③ on the needle bar connection. Tighten screw ③ after adjusting.

### 4-1 机针的调节 (图 3 和图 4)

- 1) 在调整缝纫机之前要先拿下面板、上送料牙和压脚。向前旋转皮带轮，直到机针到达最高位置，将针取下来。
- 2) 将针夹留在最高位置，将新的机针②和①尽可能深地插入针夹中。针尖向下，针柄放进针夹中。针上的长槽向前或者朝向您。用螺丝④固定针。保证螺丝拧到针的平面上。
- 3) 安装好机针以后，向前旋转皮带轮，检查左边的机针①能进入针板孔的中心。
- 4) 在必要情况下进行调整的时候，先松开挑线杆上的螺丝③，再旋转针杆②。调整好以后再拧紧螺丝③。

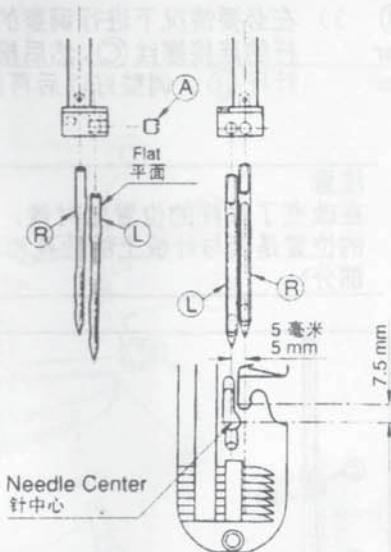

Fig.3

图 3

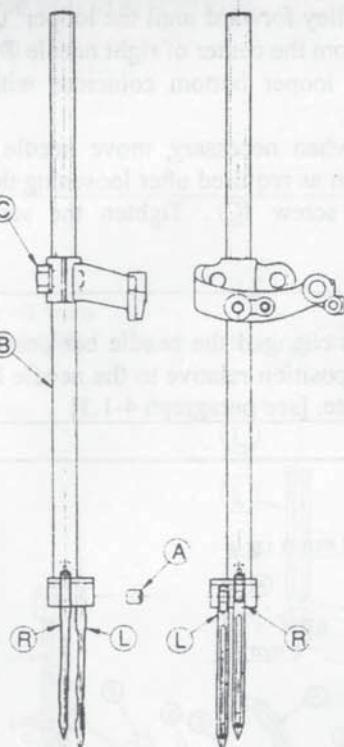

Fig.4

图 4

#### 4. Adjusting/调整

##### 4-2. Setting the Overedging Lower Looper (Figure 5)

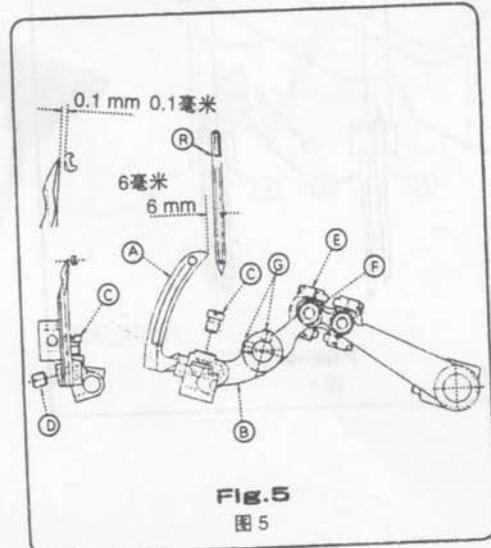

- 1) remove the base cover, throat plate, feed dog, throat plate support and needle guard.
- 2) Insert lower looper **A** into the hole at the rear of looper drive **B**, and hand tighten screw **C**.
- 3) Turn the pulley forward until the needle is in the lowest position. At this time, check that the lower looper point is 6 mm from needle **R** center.
- 4) To adjust when necessary, Loosen nut **F**, holding the looper drive and ball joint **E**, and move the looper drive so that the looper point is 6 mm from needle center. Tighten the nut after adjusting.
- 5) Fix the lower looper in place with screws **C** and **D**.
- 6) Turn the pulley forward to make sure that the looper point is 0.1 mm from right needle **R** when the looper passes behind the needle.
- 7) To adjust when necessary, move the looper drive back and forth after loosening screw **G**. Tighten the screw when the 0.1 mm gap is achieved.

##### 4-3. Needle Bar Height (Figure 6)

- 1) Turn the pulley forward until the looper **A** point is 5.2mm from the center of right needle **R**.
- 2) Check that looper bottom coincides with top of needle hole.
- 3) To adjust when necessary, move needle bar **B** up and down as required after loosening needle bar connection screw **C**. Tighten the screw after adjusting.

##### Note

When you have changed the needle bar position, recheck needle position relative to the needle hole on the throat plate. [see paragraph 4-1.3]

##### 4-2 调节低位包边弯针 (图 5)

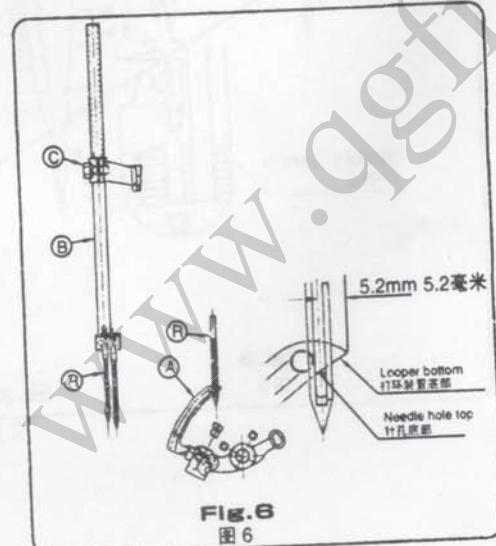

- 1) 取下罩壳、针板、送料牙、针板支架和护针器。
- 2) 将低位包边弯针 **A** 插入双弯针架 **B** 后面的孔中，用手拧紧螺丝 **C**。
- 3) 向前旋转皮带轮，直到机针位于最低位置。这时检查低位包边弯针的尖头距离机针 **R** 的中心距是 6 毫米。
- 4) 在必要情况下进行调整的时候，松开固定弯针传动机构的螺母 **F** 与小连杆接头 **E**，移动双弯针架，使得弯针的尖头距离机针的中心 6 毫米。
- 5) 用螺丝 **C** 和 **D** 将低位包边弯针固定在它的位置上。
- 6) 向前旋转皮带轮，确保在弯针通过机针后面的时候，弯针的尖头距离右边的机针 **R** 0.1 毫米。
- 7) 在必要情况下进行调整的时候，先松开螺丝 **G**，然后前后移动弯针传动机构。当间距达到 0.1 毫米的时候再拧紧螺丝。

##### 4-3 针杆的高度 (图 6)

- 1) 向前旋转皮带轮直到弯针 **A** 的尖头距离右边的机针 **R** 的中心为 5.2 毫米。
- 2) 检查弯针的底部与针孔的顶部重合。
- 3) 在必要情况下进行调整的时候，先松开针杆的连接螺丝 **C**，然后根据需要上下移动针杆 **B**。调整好以后再拧紧螺丝。

##### 注意

在改变了针杆的位置的时候，要重新检查机针的位置是否与针板上的针孔相对应。[请看 4-1.3 部分]

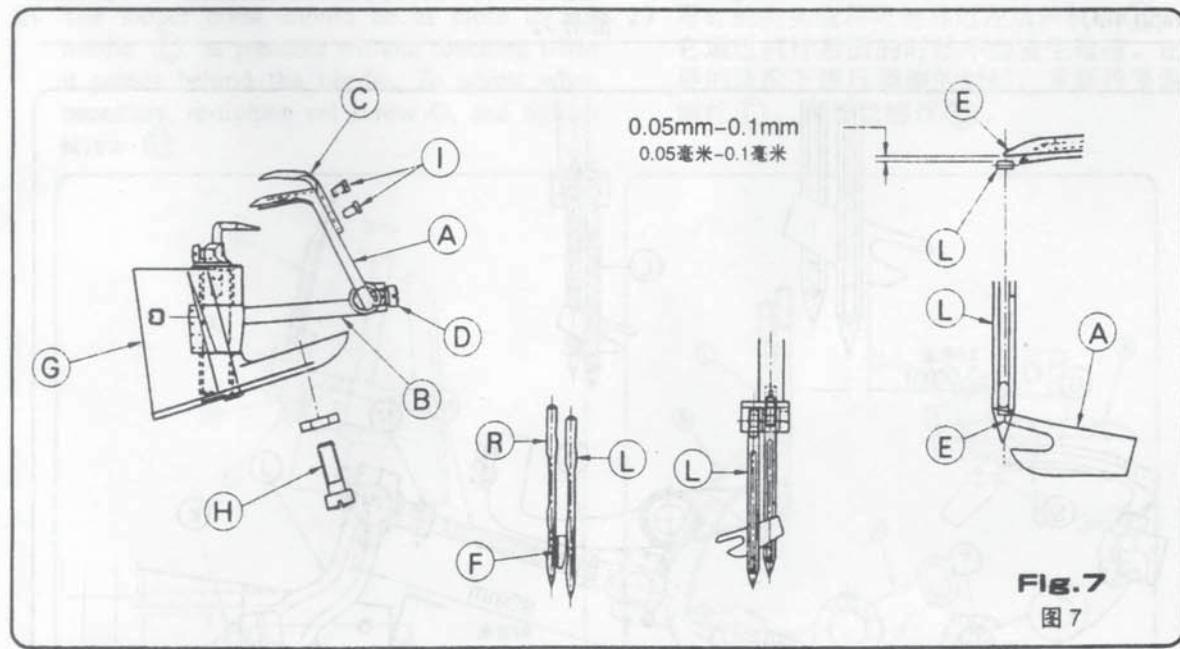

## 4. Adjusting/调整

### 4-4 Setting the Overedging Spreader (Figures 7 and 8)

- 1) Remove loop guide © before installing spreader A on spreader lever B. This facilitates visual confirmation of your adjustment.
- 2) Insert the spreader into the spreader lever. Hand tighten screw D.
- 3) Turn the pulley forward to check that needle rear is 0.05 to 0.1 mm from spreader point when spreader point E passes behind left needle L. At this time, spreader rear F must clear the front of right needle R. Tighten the screw after adjusting.
- 4) To adjust the gap between needle rear and spreader point, move bearing for spreader lever shft G up and down after loosening screw H on bearing G.
- 5) Tighten thread hook C on the spreader with screw I.
- 6) Turn the pulley forward and adjust the thread hook so that it will not touch the rear of the right needle.

### 4-4 调节高位包边弯针 (图 7 和图 8)

- 1) 在将弯针 A 安装在弯针架上之前，要先拆下导线钩 C，这方便于您用眼睛确认调整。
- 2) 将弯针插入弯针架中。用手拧紧螺丝 D。
- 3) 向前旋转皮带轮，检查当高位包边弯针的尖头 E 经过左边机针 L 后面的时候，机针后面距离弯针的尖头为 0.05 到 0.1 毫米。这时，包边弯针的后部 F 一定要跳过右边的机针 R 的前面。调整好以后再拧紧螺丝。
- 4) 为了调整针的后面与包边弯针的尖头之间的间距，要先松开弯针轴座 G 上的螺丝 H，然后上下移动弯针轴座 G。记得在调整好以后再拧紧螺丝。
- 5) 用螺丝 I 拧紧高位包边弯针上的导线钩 C。
- 6) 向前旋转皮带轮，调整导线钩，使得它不会碰到右边的针的后部。

#### 4. Adjusting/调整

- 7) Turn the pulley forward and adjust so that the spreader recess is 3.6 mm from needle center when the spreader is in the most forward position.
- 8) To adjust when necessary, move drive lever for upper spreader **J** right and left after loosening screw **K**. Remember to tighten the screw after adjusting.
- 9) Turn the pulley once forward to make sure that the spreader does not contact any parts.
- 10) Set the ball joint center distance at 99 mm before proceeding to the following steps.
- 11) When the spreader motion is too large and the spreader touches other parts, turn joint rod **M** as appropriate after loosening nuts **N** and **P**.

Note  
Nut **P** is left threaded.

- 12) Re-check the gap between the spreader recess and needle center. Turn the pulley once forward to make sure that the spreader clears all parts.
- 13) Turn the pulley forward to make sure that spreader point **S** just clears lower looper **O** at its back as the spreader ascends.  
To adjust when necessary, move the looper drive right and left after loosening ball joint nut **T**. Be sure to tighten the nut after adjusting.

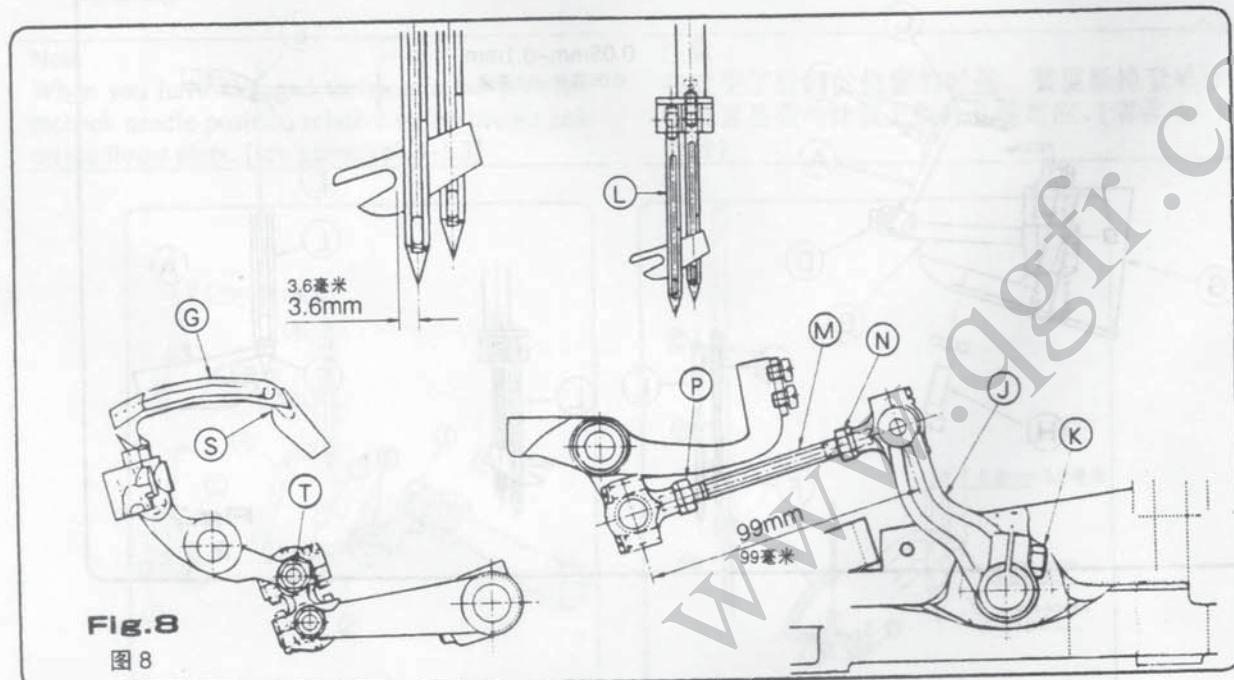

Note  
Re-check the needle bar height after adjusting (see paragraph 4-3)

- 7) 向前旋转皮带轮进行调整，当高位包边弯针正处于最前面的位置的时候，弯针的槽口距离针的中心为 3.6 毫米。
- 8) 在必要情况下进行调整的时候，先松开螺丝 **K**，然后左右移动外曲柄 **J**。
- 9) 向前旋转皮带轮一次，确信弯针不会碰到任何零部件。
- 10) 在继续下面的步骤之前，高位包边弯针小连杆的中心距离调节到 99 毫米。
- 11) 当高位包边弯针动作太大，碰到了其它零部件的时候，就先松开螺母 **N** 和 **P**，然后合理旋转接杆 **M**。

注意  
螺母 **P** 是左旋螺纹的。

- 12) 重新检查弯针槽口和机针的中心距离。向前旋转皮带轮一次，确信高位包针跳过了所有的零部件。
- 13) 向前旋转皮带轮，确信当高位包边弯针在上升的时候，弯针的尖头 **S** 正好在其背面跳过了低位包边弯针 **O**。  
在必要的条件下进行调整的时候，先松开小连杆接头的锁紧螺母 **T**，然后再左右移动弯针传动机构。在调整好以后一定要拧紧螺母。

注意  
调整好以后还要再次检查针杆的高度（请看 4-3 部分）。

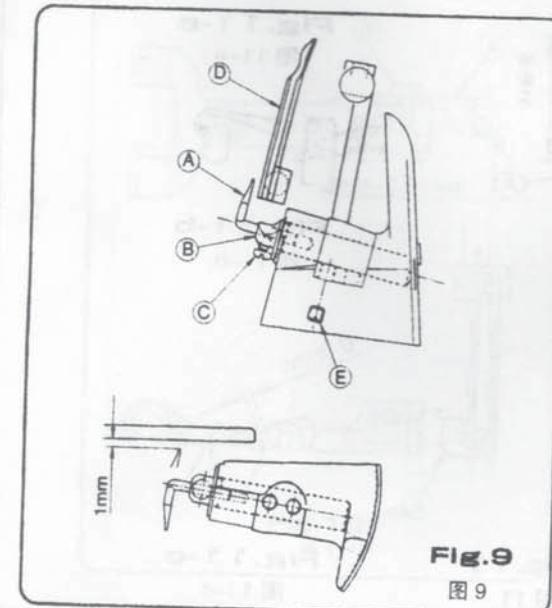

## 4. Adjusting/调整

### 4-5. Setting the Thread Retainer (Figure 9)

- 1) The thread retainer is designed to keep the looper thread just before the looper enters the needle thread loop.
- 2) Insert thread retainer **A** into spreader lever shaft **B**, and hand tighten screw **C** (the screw should hit the flat on the spreader lever shaft).
- 3) Adjust the gap between looper and thread retainer to 1 mm when thread retainer **A** is just to start moving upward and looper **D** is in the right most position. Hand tighten screw **C**.
- 4) Turn the pulley forward until the looper and thread retainer come closest to each other. The gap at this time must be 0.1 mm. To adjust when necessary, move thread retainer up and down as required after loosening screw **C**. Be sure to tighten the screw after adjusting.
- 5) Turn the pulley forward until thread retainer is in the most upward-facing position. At this time, thread retainer point should be 1 mm below the throat plate bottom. To adjust when necessary, turn spreader lever shaft **B** as appropriate after loosening screw **E**. Be sure to tighten the screw after adjusting.

### 4-6. Setting the Combined Chain-stitch Looper (Figure 10)

- 1) Insert looper **A** into the front hole on looper drive **B**. Hand tighten screw **C**.
- 2) The looper point should be as close to left needle **L** as possible without touching when it passes behind the needle. To adjust when necessary, re-tighten set screw **C**, and tighten screw **D**.

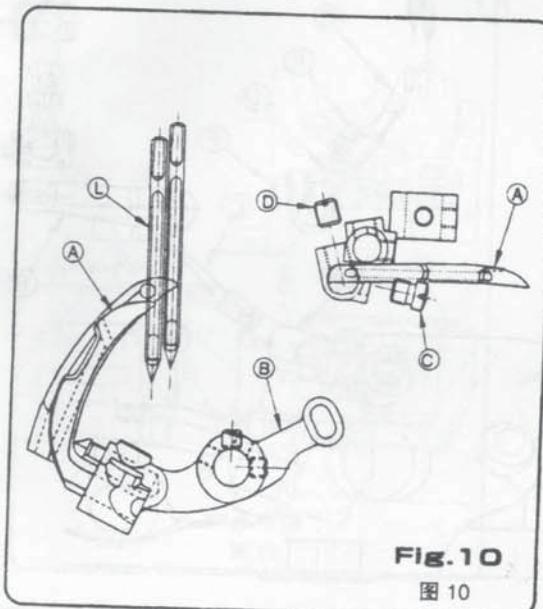

### 4-5 调节拨线钩 (图 9)

- 1) 拨线钩的设计用于在弯针进入线环之前保留缝合线。
- 2) 将拨线钩**A**塞入拨线钩轴**B**中，用手拧紧螺丝**C**（螺丝应拧到拨线钩轴的平面上）。
- 3) 进行调整，使得在拨线钩**A**刚开始向上运动的时候，弯针**D**在最右边的位置的时候，弯针与拨线钩之间的距离为1毫米。用手拧紧螺丝**C**。
- 4) 向前旋转皮带轮，直到弯针与拨线钩彼此靠近。这时候间距一定是0.1毫米。在必要的情况下进行调整的时候，先松开螺丝**C**，然后根据需要上下移动拨线钩。在调整好以后一定要拧紧螺丝。
- 5) 向前旋转皮带轮，直到拨线钩在最向上的位置。这时，拨线钩的尖头应在针板底部下面1毫米处。在必要情况下进行调整的时候，先松开螺丝**E**，然后合理旋转拨线钩轴**B**。调整好以后一定要将螺丝拧紧。

### 4-6 调节链锁弯针 (图 10)

- 1) 将弯针**A**插入双弯针架**B**前面的孔中。用手拧紧螺丝**C**。
- 2) 弯针的尖头应尽可能靠近左边的机针**L**，当它通过机针后面的时候不会发生碰撞。在必要的情况下进行调整的时候，重新拧紧调节螺丝**C**，再拧紧螺丝**D**。

#### 4. Adjusting/调整

##### 4-7 Setting the Combined Chain-stitch Cross Looper (Figure 11)

- 1) Set the ball joint center distance at 51mm.
- 2) Ball joint **A** must be installed at the center of the slot on the drive lever for cross looper.
- 3) Insert cross looper **C** into cross looper lever **D**. Hand tighten screw **E**.
- 4) Hand tighten screw **F** to hold the cross looper lever **D**. Turn the pulley forward and adjust such that the cross looper coincides with the left edge of left needle **L** when it has reached the left most position (Figure 11-a).
- 5) Turn the pulley until the cross looper reaches the right most position and the looper is moving to the right. At this time, the cross looper point must enter the looper groove at the center. To adjust, move the cross looper lever up and down as appropriate (Figure 11-b).
- 6) The gap between needle and cross looper should be 0.3 mm when the cross looper moves to the left and approaches the right side of the left needle most closely. Adjust when necessary after loosening screw **F** (Figure 11-c).
- 7) Cross looper swing is adjustable by moving ball joint **A** along the slot on drive lever for cross looper **B**.

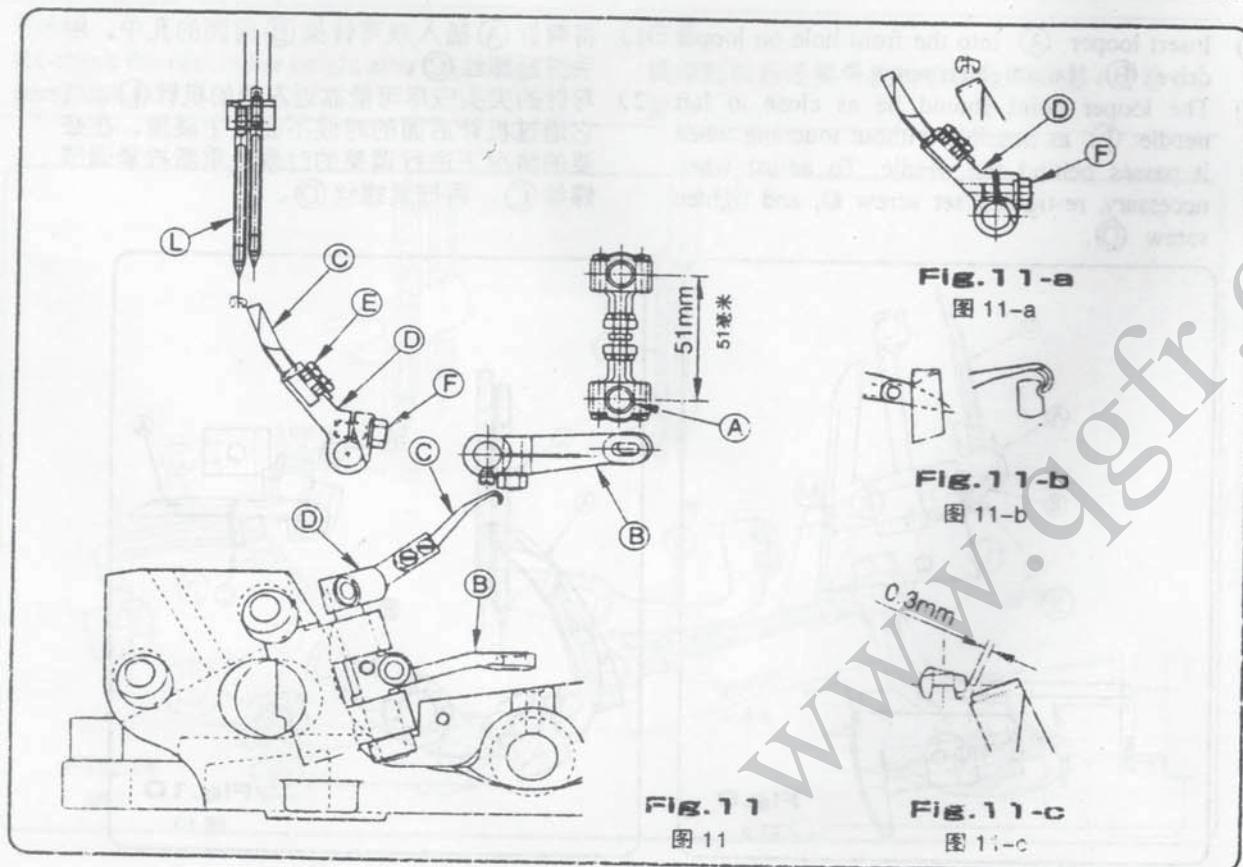

##### Note

The cross looper should never touch any other part.

- 1) 扒线小连杆接头的中心距离调节到 51 毫米。
- 2) 连杆接头 **A** 必须安装在扒线弯针曲柄槽中央。
- 3) 将扒线弯针 **C** 插入扒线弯针架 **D** 中。用手拧紧螺丝 **E**。
- 4) 用手拧紧螺丝 **F** 固定加长扒线弯针架 **D**。向前旋转皮带轮进行调整，使得扒线弯针在到达最左边的位置的时候，它与左边的机针 **L** 的左边重合（图 11-a）。
- 5) 旋转皮带轮直到十字弯针到达最右边的位置，十字弯针正向右运动。在这时候，十字弯针的尖头一定位于这个弯针的槽的中央。在进行调整的时候，合理上下移动十字弯针架（图 11-b）。
- 6) 扒线弯针向左运动，当运动到最靠近左边的机针的右边的时候，机针与扒线弯针之间的间距应该为 0.3 毫米。在必要的时候松开螺丝 **F** 进行调整（图 11-c）。
- 7) 扒线弯针的运动，是可以通过沿着扒线弯针曲柄 **B** 的长槽移动连杆接头 **A** 进行调整的。

##### 注意

扒线弯针在任何时候都不能碰到任何其它零部件。

#### 4. Adjusting/调整

##### 4-8. Setting the Needle Guard (Figure 12)

- 1) Needle guard **A**, in the most retracted position, must be 0 to 0.05 mm from needle. (Note that thread skipping is prevented when the needle guard is so adjusted as to push the needle about 0.1 mm when sewing thick materials.)
- 2) Adjust the needle guard back and forth after loosening screw **B**.

##### Note

Re-set the needle guard when you have changed the stitch width.

##### 4-9. Setting the Lower Feed Dog (Figure 13)

- 1) Lower feed dog **A** must be centered in the slots of throat plate **B** both longitudinally and laterally.
- 2) To adjust, move feed rocker **C** right and left as appropriate after loosening screw **D**. Tighten the screw after adjusting.
- 3) Turn the pulley forward until the feed dog is in the highest position. At this time, the feed dog rear must be 1.2 mm above the throat plate.
- 4) Adjust the screw such that the height of 1.2 mm is maintained when the feed dog is pressed against screw **E** on feed bar **F**. Now fix the feed dog with nut **G**.

##### 4-10. Installing the Throat Plate Support (Figure 13)

- 1) Install throat plate support **H** with two screws **I**.

Check that the throat plate support does not contact any other parts.

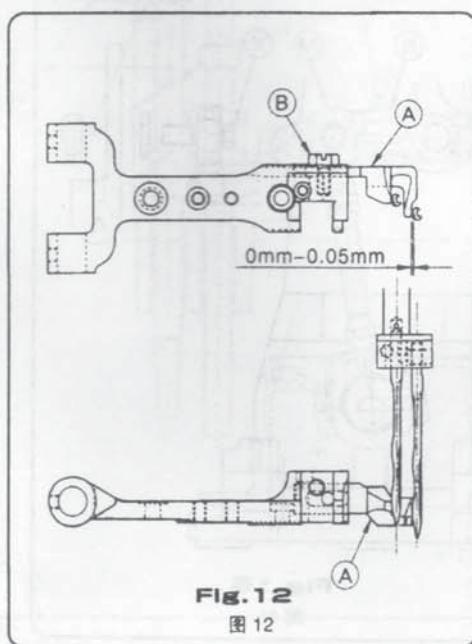

Fig. 12

图 12

##### 4-8 调节护针器（图 12）

- 1) 护针器**A**在缩到最里边位置的时候，它与针之间的距离必须为 0 到 0.5 毫米。（注意，在缝纫厚实的材料的时候，调整护针器，向前推动大约 0.1 毫米，能防止跳线。）

- 2) 松开螺丝**B**以后，前后调整护针器。

##### 注意

当针距宽度改变的时候要重新调节护针器。

##### 4-9 调节下送料牙（图 13）

- 1) 下送料牙**A**在纵向和横向都必须定心在针板**B**的槽中。
- 2) 在进行调整的时候，要在松开螺丝**D**以后合理左右移动开针架**C**。调整好以后再将螺丝拧紧。
- 3) 向前旋转皮带轮，直到送料牙位于最高位置。这时，送料牙的上部必须露出针板约 1.2 毫米。
- 4) 调整螺丝，当送料牙压在牙架**E**上的螺丝**F**上的时候，能保持其高度为 1.2 毫米。再用螺母**G**固定送料牙。

##### 4-10 安装针板支架（图 13）

- 1) 用两个螺丝**I**安装针板支架**H**。检查针板支架是否会碰到其它零部件。

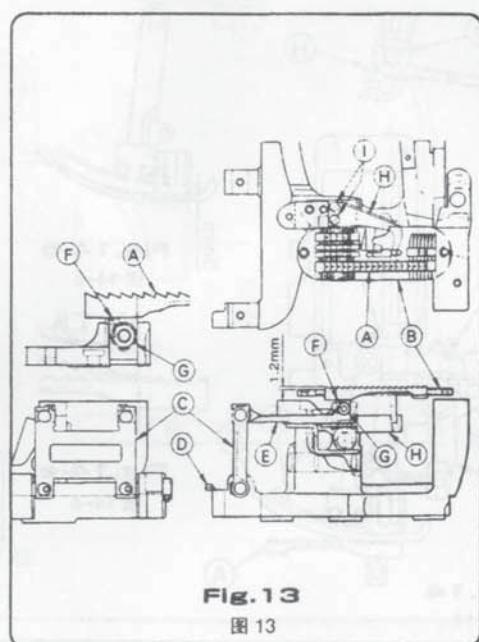

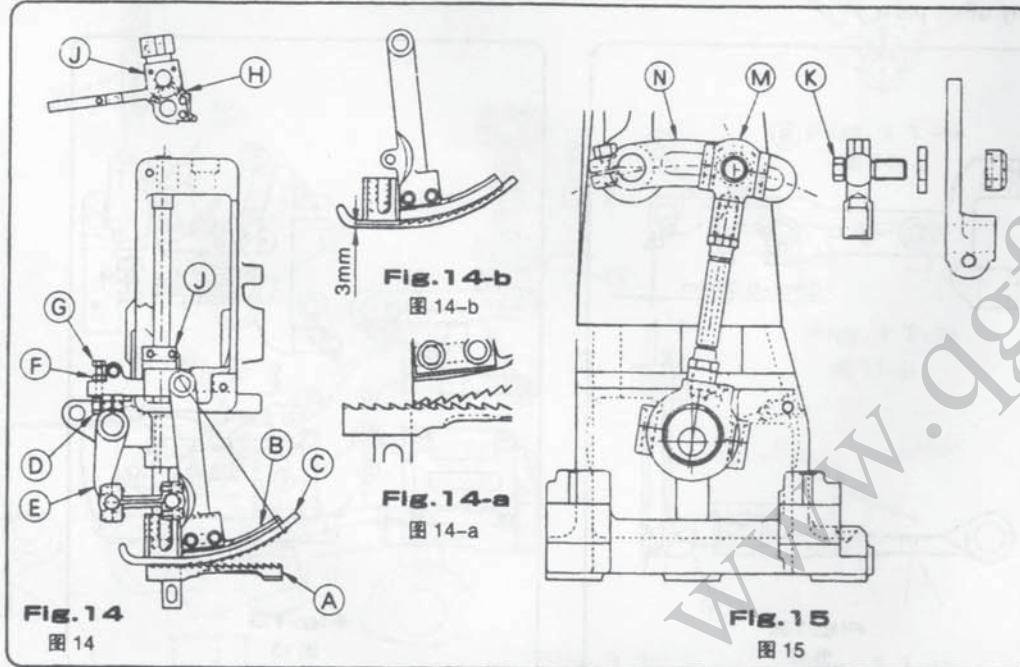

Fig. 13

图 13

#### 4. Adjusting/调整

##### 4-11. Setting the Upper Feed Dog (Figures 14 and 15)

- 1) Install upper feed dog **B** and presser foot **C**.
- 2) The upper feed dog should freely move in the presser foot slots without any contact.
- 3) The upper feed dog must be in the lowest position when lower feed dog **A** is in the highest position. At this time, a small gap should exist between the upper and lower feed dogs.
- 4) The upper and lower feed dog feed work simultaneously. In Figure 14-a, the upper feed dog rear must be positioned between the 5<sup>th</sup> and 6<sup>th</sup> tooth from rear of the lower feed dog when the upper feed dog is in the lowest position. To adjust, loosen screw **D** and move the drive lever back and forth. Tighten the screw after adjusting.
- 5) To adjust the gap between upper and lower feed dog, Loosen nut **F** and turn screw **G** inwardly to increase the gap. Turn screw **G** outwardly to decrease the gap. Tighten the nut after adjusting.
- 6) To effect the same amount of motion for upper and lower feed dog, Loosen ball screw **K** and move ball joint **M** back and forth in the slot of rocker lever **N**.
- 7) The upper feed dog sharply rises in its return stroke. This is necessary to prevent pulling of work in the opposite direction of feed.
- 8) The upper feed dog **B** teeth must be 3 mm inside the presser foot when the feed dog is in the highest position (Figure 14-b).
- 9) To adjust, Loosen screw **H** and raise slide block **J** to lift the upper feed dog. Lower the slide block to lower the upper feed dog. Tighten the screw after adjusting.

##### 4-11 调节上送料牙 (图 14 和图 15)

- 1) 安装上送料牙 **B** 和压脚 **C**。
- 2) 上送料牙必须能够在压脚中自由运动，不会碰到任何东西。
- 3) 当下送料牙 **A** 在最高位置的时候，上送料牙一定在最低位置。这时候，在上送料牙与下送料牙之间应存在一个不大的间距。
- 4) 上送料牙与下送料牙的工作是同步的。在图 14-a 中，当上送料牙在最低位置的时候，上送料牙的后部必须定位在下送料牙后面的第五个齿与第六个齿之间。在进行调整的时候，松开螺丝 **D**，前后移动差动连杆。调整好以后再将螺丝拧紧。
- 5) 要调整上送料牙与下送料牙之间的间距，必须先松开螺母 **F**，再向里面转动螺丝 **G**，增大间距。如果向外转动螺丝 **G**，间距就减小。调整好以后再拧紧螺丝。
- 6) 为了使上送料牙与下送料牙之间的动作幅度大小一样，要先松开圆头螺丝 **K**，在差动调整曲柄 **N** 的槽中前后移动差动调整连杆上接头 **M**。向前移动会使动作减小，向后移动会使动作增大(图 15)。调整好以后再拧紧螺丝。
- 7) 上送料牙在它的返回过程中会急剧升高。这是防止工件沿着送料方向向回拉动所必需的。
- 8) 上送料牙 **B** 在最高位置的时候，它的牙必须在压脚内部 3 毫米处(图 14-b)。
- 9) 在进行调整的时候，先松开螺丝 **H**，然后抬起滑块 **J**，升高上送料牙。降低滑块会使得上送料牙下降。调整好以后再拧紧螺丝。

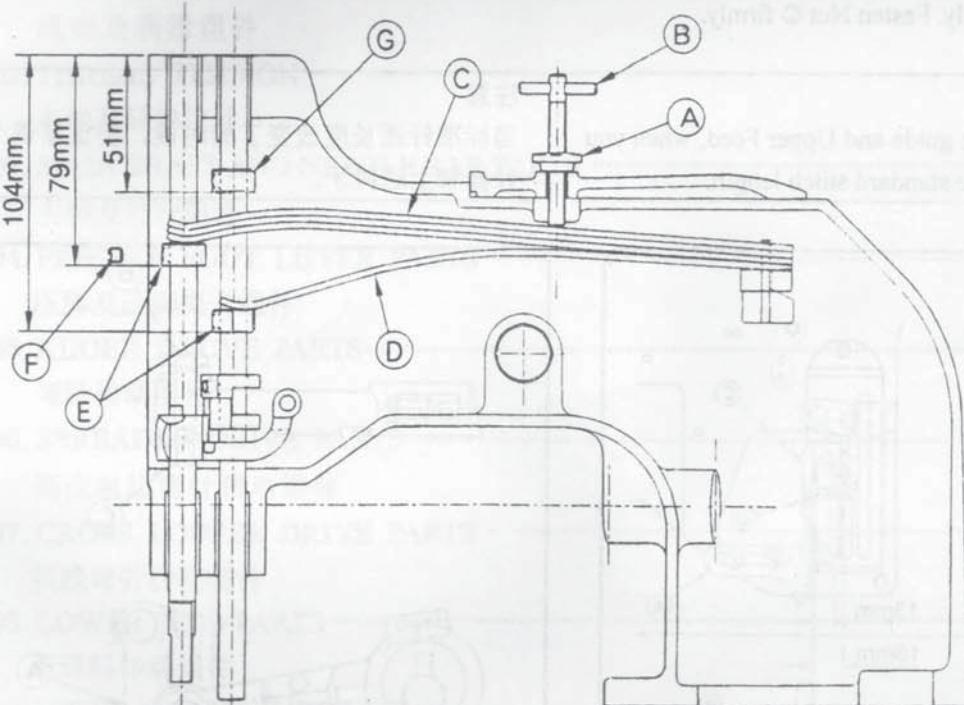

#### 4. Adjusting/调整

##### 4-12. Setting Presser Foot Pressure (Figures 16)

- 1) Remove the top cover.
- 2) Loosen lock nut **(A)** and turn **(B)** outwardly so that presser foot spring, upper and lower, **(C)** and **(D)**, are completely pressure-free.
- 3) Collars **(E)** for springs **(C)** and **(D)** should be set 79 and 104 mm below the arm top as shown in the figure, respectively. Fix the collars with screw **(F)**.
- 4) Set collar **(G)** 51 mm below the arm top. Collar **(G)** prevents the spreader and needle holder from hitting the presser foot when the presser foot and other parts are lifted with the presser foot lifter lever.
- 5) Turn the pulley forward to bring the lower feed dog just below the throat plate.
- 6) Turn screw **(B)** inwardly to apply pressure to the presser foot springs. Tighten nut **(A)** when an appropriate pressure is applied to the springs.
- 7) Set up the top cover.

##### 4-12 调节压脚压力板 (图 16)

- 1) 拆下顶盖。
- 2) 松开锁紧螺母**(A)**并向外旋转螺丝**(B)**，使得高位和低位的压杆簧**(C)**和**(D)**全都没有压力。
- 3) 弹簧**(C)**和**(D)**的垫圈**(E)**分别比图中所示的机头顶部要低 79 毫米和 104 毫米。用螺丝**(F)**拧紧垫圈。
- 4) 将垫圈**(G)**调节到机头顶部下面 51 毫米处。当压脚和其它零部件随着压脚提升装置一起升高的时候，垫圈**(G)**能防止弯针和护针器撞到压脚。
- 5) 向前旋转皮带轮，使得下送料牙正好在针板下面。
- 6) 向里边旋转螺丝**(B)**，给压脚的弹簧施加压力。当施加到弹簧上的压力合适的时候拧紧螺母**(A)**。
- 7) 盖好顶盖。

**Fig. 16**

图 16

#### 4. Adjusting/调整

4-13. Setting the Edge Guide and Stitch Tongue (Figures 17)

- 1) Set the Edge Guide **A** on the Base Cover by Screw **B** as near as possible to Presser Foot, but never touch it.
- 2) Set the Stitch Tongue **C** by Screw **D**.
- 3) The thread loop pass through the Stitch Tongue and on the Cloth and if should be retained until the Needle can go into the thread loop.

##### Note

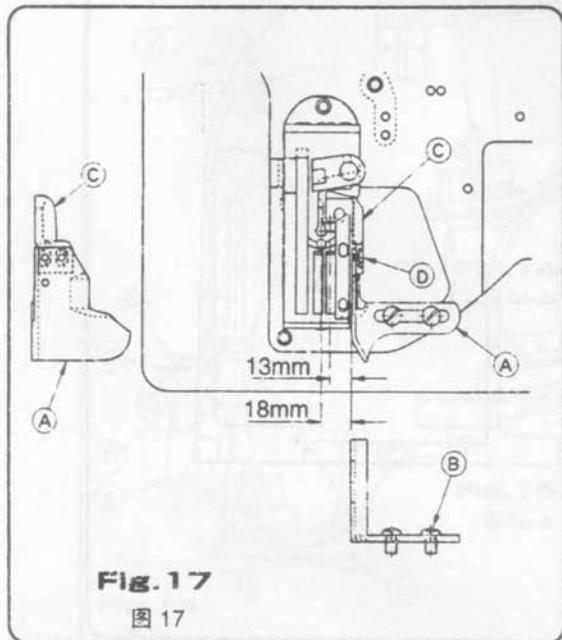

The spreader never touch the Stitch Tongue.

4-14. Change of Stitch Length (Figures 18)

- 1) Standard setting of the stitch length of the machine is 10 mm.
- 2) When changing standard stitch length, please adjust the Stitch Regulating Stud **B** which is in the Feed Rocker **A** under the machine base. Loosen Nut **C** and lower the Stitch **B** Regulating Stud to lengthen the the stitch and raise to reduce it .
- 3) Tighten Nut **C** loosely and run several pieces of machine in order to confirm the required stitch length. Finally. Fasten Nut **C** firmly.

##### Note

Reset the Needle guide and Upper Feed, when you have changed the standard stitch length.

4-13 调节导布器和针距舌片 (图 17)

- 1) 通过螺丝 **B** 调节罩壳上的导布器 **A**，使其尽可能靠近压脚，但是不要碰到压脚。
- 2) 通过螺丝 **D** 调节针距舌片 **C**。
- 3) 线环穿过针距舌片到达布料上面，在针进入线环之前要保持这个样子。

##### 注意

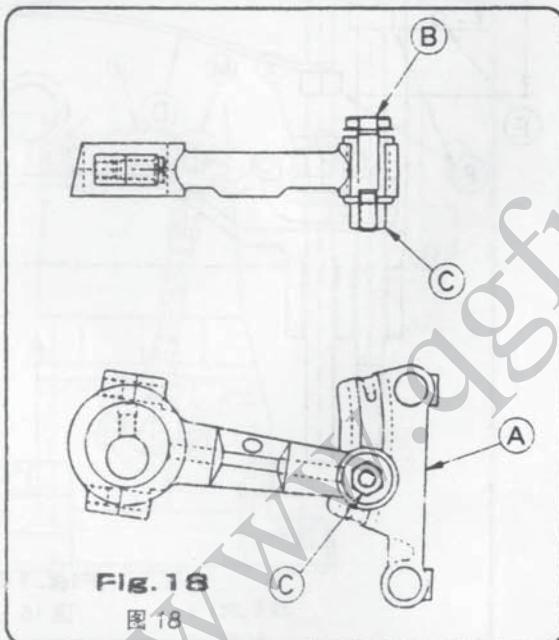

弯针千万不能碰到针距舌片。

4-14 改变针距的长度 (图 18)

- 1) 机器针距长度的标准设置值是 10 毫米。
- 2) 改变标准针距长度的时候，请调整机器罩壳下面的开针架 **A** 中的针距调节螺钉 **B**。松开螺母 **C** 并降低针距调节螺钉 **B** 加长针脚，或者升高针距调节螺钉 **B** 减小针距。
- 3) 为了确认针距的长度是否达到要求，请拧先上螺母 **C** 但是不要拧紧，在机器上缝纫几个碎片。最后再拧紧螺母 **C**。

##### 注意

当标准针距长度改变了的时候，要重新调节护针器和上送料牙。

## ORDERING PARTS

1. Description of each part and its stamp number is described in this parts list. Screws and nuts for parts are shown adjacent to the relevant parts. When ordering parts, describe clearly stamp number with its name of part.
  2. The parts which have no Ref. Number can not be delivered independently; always order it as an assembly.
  3. A set of assembled parts is represented by the stamp number of its main parts.
  4. The last figure on the parts stamp number advances on each improvement of the parts.
  5. Parts No. described in [ ] of Remarks means old parts No.
- \* The parts list is subject to change without prior notice.

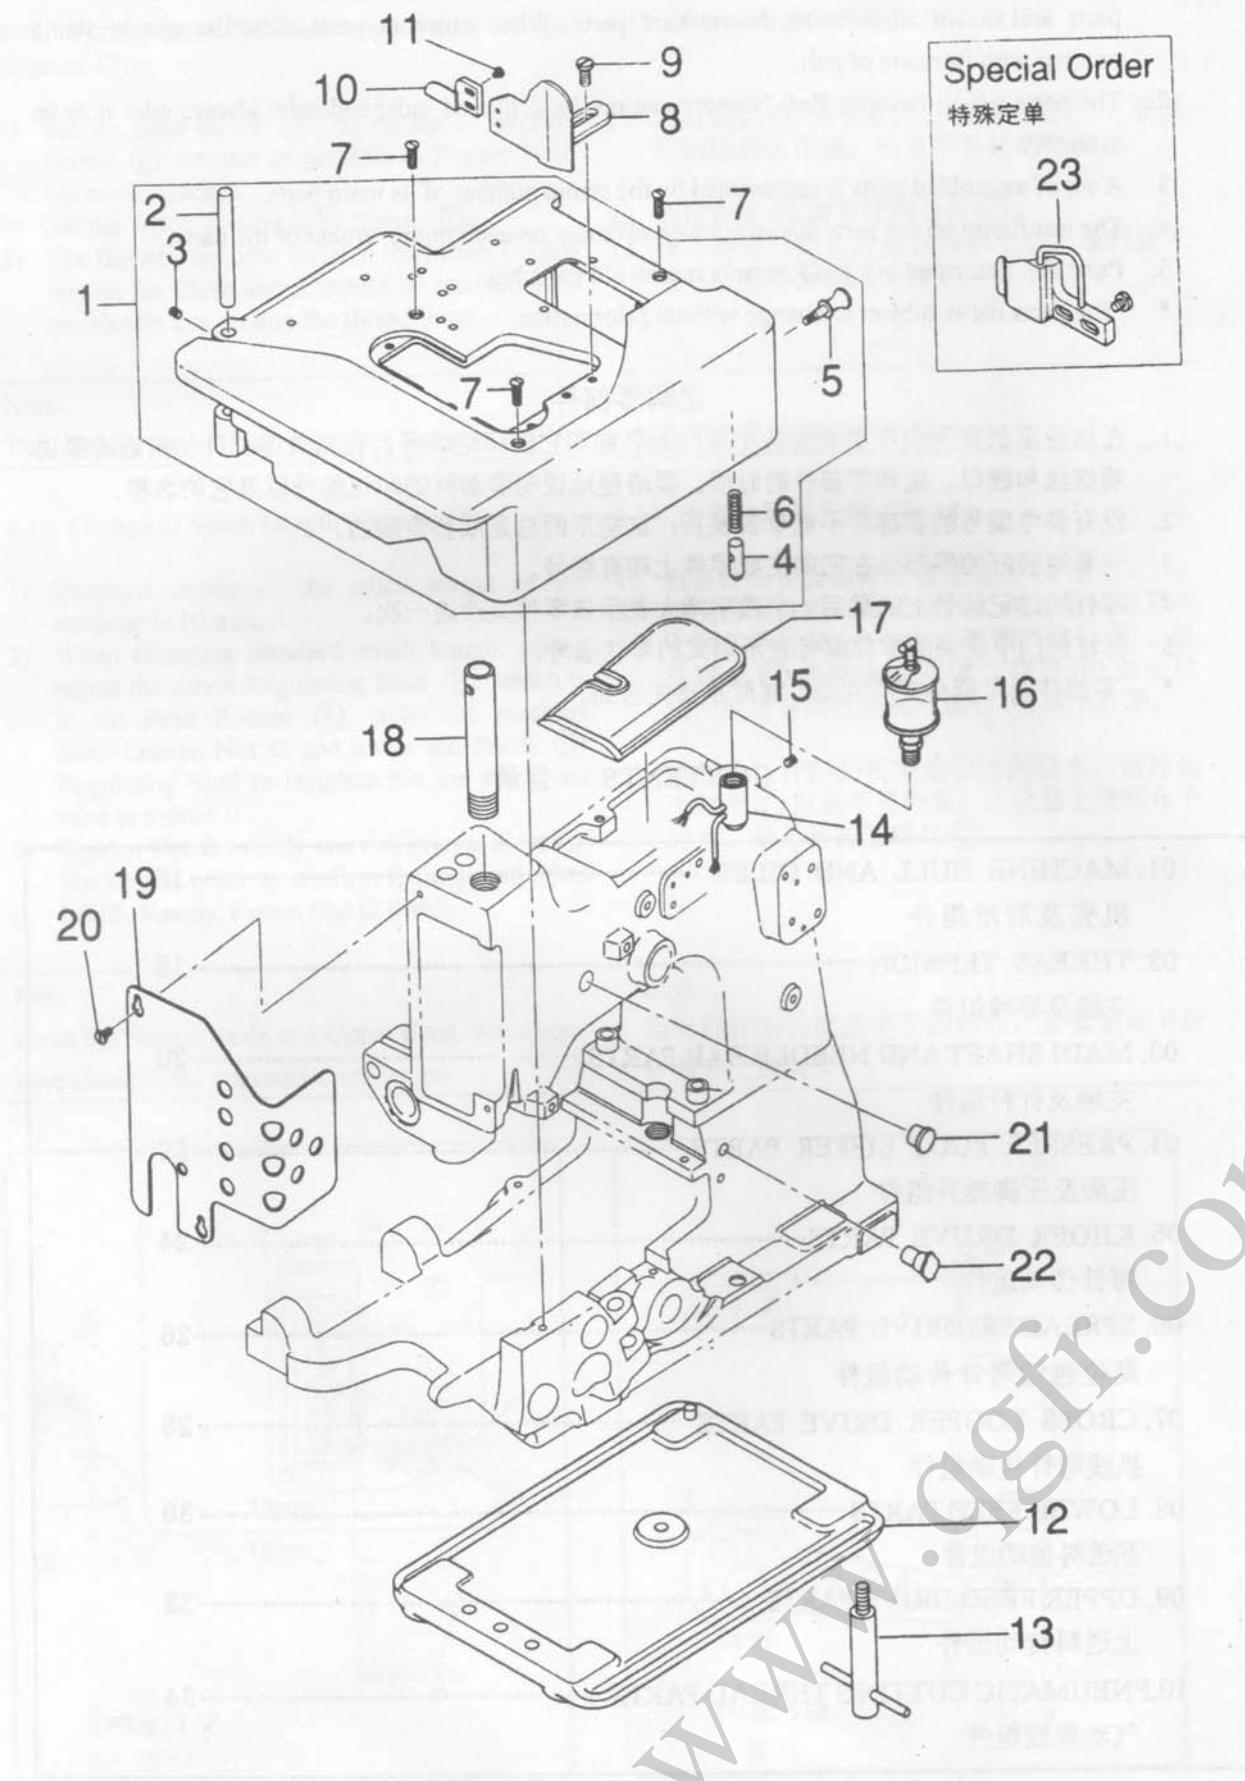

### 定购零部件

1. 在这份零部件列表中要说明各个零件的名称和它的印记编号。在相关零部件的附近还要说明螺丝和螺母。定购零部件的时候，要清楚地说明零部件的印记编号以及它的名称。
  2. 没有参考编号的零部件不能单独发货；这些东西总是成套定购的。
  3. 一套组装好的零部件在它的主要零件上印有编号。
  4. 零件的印记编号上的最后一个数字增大表示该零件又改进一次。
  5. 标注的[ ]中说明的零件编号表示老式的零件编号。
- \* 零部件表可能会有所变动，届时不事先通知。

## CONTENTS 目录

|   |    |
|---|----|
| 01. MACHINE HULL AND OILER .....          | 16 |
| 机壳及润滑组件                                   |    |
| 02. THREAS TENSION .....                  | 18 |
| 夹线及导线组件                                   |    |
| 03. MAIN SHAFT AND NEEDLE BAR PARTS ..... | 20 |
